

**Wastewater:
Non-Operational Wastewater Facilities Impacted by Hurricane Harvey
TCEQ Dataset 12.28.2017**

Total Non-Operational WW Facilities
(Current Status = NonOp):

3

County	Current Status	WW ID	Facility Name	Estimated Time to Restore	Comments	Population Served
Harris	NonOp	1160000	U.S. ECO PARK	Months	Still offline. Placed an order for new aerator motors, aerators have been delayed (only 2 ready). Planning the cleanup project of the aeration basins and re-seeding the plant (coordinating with GCWDA to receive sludge) after aerators received. Cleaning and reseeded of the aeration basins still needs to be done. Receiving influent to the primary clarifier, storing water in three clarifiers and an aeration basin. Discharges with chlorination when needed.	Industrial WW
Harris	NonOp	10932001	HARRIS COUNTY - BEAR CREEK PIONEERS PARK WWTP	Weeks	Facility pumping and hauling. Park indicated that the wastewater treatment plant services will be open today, facility plans to pump and haul any waste using their three frac tanks which hold a combined 66,000 gallons. Five lift stations, the main ones, are operational with four lift stations servicing out-of-operation facilities still up for repair.	500
Harris	NonOp	11713001	CEDAR BAYOU PARK UTILITY DISTRICT - CEDAR BAYOU PARK WWTP	Months	All electrical pumps down. Sending waste water to Baytown under a verbal agreement with City of Baytown. They plan on shutting down the plant and sending wastewater to Baytown permanently.	Public Domestic WW
